

MOSCOW MULE DELUXE

INGREDIENTS

50ml Stolichnaya
25ml Fresh Lime Juice
100ml Ginger Champayne

METHOD

Combine All ingredients into a copper mug filled with ice. Garnish with a discharged lime wheel

FACT: The Moscow Mule was invented at the Cock n Bull Bar in Los Angeles in the late 1940s with the head bartender and John G Martin, who owned the rights to the FRENCH vodka brand named Smirnoff. America was very adverse to a clear and flavourless liquid, especially one that would originate from communist Russia and Martin was the 3rd such industrialist to attempt getting the US to drink vodka, so they devised a cocktail that any bartender of any skill could replicate and served it in a unique copper cup. This one single cocktail catapulted vodka into the hands of movie stars and saved the Smirnoff brand from complete bankruptcy.
